

# Listing of US Aerospace Companies, Divisions and Locations

2007

School of Aerospace Engineering  
Georgia Institute of Technology  
Atlanta, GA 30332-0150

## **Contents**

### A List of Aerospace Companies

Fixed Wing Aircraft Developers  
Rotary Wing Aircraft Developers  
Gas Turbine Engine Developers  
Space Launch Vehicle Developers  
Spacecraft Developers  
Missile Developers  
Rocket Engine Developers  
Lighter than Aircraft Developers  
UAV and Drone Developers  
Airline (Major) Operators  
All-Cargo Airline Operators  
Composite Aircraft Structures Developers, Subcontractors  
Research Organizations  
Software Developers  
Consulting Organizations  
Service Organizations

## Summary

This listing is intended to help aerospace engineering students locate job opportunities in desirable areas of the US according to their personal needs. The compilation shows that every large aerospace organization has some presence in every state. Please note that some companies are listed more than once, if they develop products in more than one category.

The Table of Contents shows companies representing “major” technology areas. Not listed are companies specifically specializing in:

Regional Airlines  
Air Traffic Control Radars/Systems  
Communication/Navigation Systems  
Data Processing Systems  
Displays and Instruments  
Electronics/ Avionics Systems  
Electronic Warfare Systems  
Weapons Control and Targeting Systems  
Aircraft, Missile and Space Subcontractors

although such companies do employ aerospace engineers.

## Use of Information in this Report:

Once a company and a location (by State) has been located by the user, it is recommended that the address and further details be obtained through the use of the 1400 page “World Aviation Directory” to be found in the AE Main Office on the 3<sup>rd</sup> floor of the Montgomery Knight Building. This is recommended because one business acquiring another and business

name-changes are both commonplace. The directory also contains relevant information on the “Not listed companies” shown above.

### Comment

Not included in this listing are the various government and military service organizations also involved in aerospace activities, which include the NASA organizations\*, the Army, Air Force and Navy Research Centers, and the various FAA Branches, to list a few. Also not included are the many support organizations usually located close to the government and service agencies identified above. These latter are usually highly specialized companies involved in advanced technology work.

The aerospace business in the US is immense. The international aerospace business is also large. International aerospace cooperation is very active now and will increase in the future.

We hope the information in this report will enhance your chances of entering this fascinating field.

Good Luck.

\*Research Centers, such as:

Goddard - D.C. area

Johnson Space Flight - Houston, TX

Langley - Hampton, VA

Glen - Cleveland, OH

Ames - Palo Alto, CA

Dryden - Edwards AFB, CA
