## VITA

Zhong Yang was born in Guizhou, China on March 09, 1969. He started his university studies in the Department of Aircraft Design and Applied Mechanics at Beijing University of Aeronautics and Astronautics, where he earned his Bachelor of Science degree in July 1989. He continued to engage in graduate study at Beijing Institute of Aerodynamics and received Master of Science degree in June 1992. From July 1992 to August 1996, he worked as an aerodynamics engineer at the Transonic Wind Tunnel Experiment Division at Beijing Institute of Aerodynamics. From January 1995, he also worked in Ground-Effect Vehicle Research and Development Center at Chinese Academy of Science and Technology Development. In September 1996, he came to the United States and entered doctoral program in School of Mechanical Engineering at John Hopkins University. After a short period, he transferred to Georgia Institute of Technology to pursue his Ph.D in Aerospace Engineering. He is a student member of the American Helicopter Society and the American Institute of Aeronautics and Astronautics.
